

FUEL LEVY SURCHARGES

To our valued customers,

Fuel Levy Surcharges are currently in place.

We have seen significant levies applied by not only our product suppliers, but also our cartage contractors. On top of that, we are experiencing very high running costs on our plant and equipment (loaders/trucks).

Whilst we are absorbing the larger part of these costs, it is essential to our survival as a business that we forward some of these on.

Please note the following Fuel Levy Surcharges:

- Effective as at 01.04.26 to all products purchased, a flat rate 5% Fuel Levy will be applied

to the invoice total, we will display it as a separate line item.

- Effective as at 01.04.26 on all deliveries out of our yard, a \$10 dollar fuel levy will be applied to all tipper deliveries and a \$20 fuel levy will be applied to all concrete deliveries.

We will be holding these surcharges into the unforeseen future, as we are all facing the uncertainty of fuel demand and increase costs whilst the conflict is still rapid.

However, we will continue monitoring the situation weekly and adjust accordingly when required or remove once fuel prices stabilise.

We Thank You for your understanding and continued support.

Greg Spence.
